

Acknowledgements

The concept of the chiropractic therapy assistant program in Tennessee was developed by the Tennessee Chiropractic Association and approved by the Board of Directors. This book was made possible because of their vision to continually expand the effectiveness of chiropractic care. Special thanks to Dr. Chris Alexander and Dr. Beth Barnett for their excellent leadership and trust throughout the writing process. Enduring gratitude is given to Lamont Carter who has overseen the development and supported the vision, provided alternate perspectives, and empowered advancement of the CTA program through many of its stages. Thank you to Tiffany Stevens who has spent countless hours researching, writing, editing, phoning, faxing, emailing and texting. She worked tirelessly to insure this text will help grow and guide current and prospective chiropractic therapy assistants to achieve unimaginable potential. To all the authors, editors and reviewers of this text, there is no way to express gratitude for the time and effort you put toward this text. Thanks to you, Amy Owsley, for your constant support and help with the administrative affairs of the book at the TCA. Thanks to Emily Parrish, whose editing ability sharpened each page of this book. A special thanks to John Williams, without your advice and guidance the book would have never begun. To the book's illustrator, provided through Nossi College of Art, a debt of gratitude for your wonderful drawings and timely turnaround in production is warranted. Much gratitude to the staff of Parris Printing for their quality work and understanding of the nature of the continual "re-do", "add that", or "take this out." Great thanks to our "models," Stephanie Bridge, Nicole Mooney, Jamie Ligon, Sara Harris, Denise Hill, Tess Wilkerson, Jane Hosenfeld, Cathy Smith and Mark Pruitt for their multiple maneuvers and placements throughout the photography process. A final thank you to the current CTA's for helping my understanding of their imperative role in the growth and advancement of the chiropractic profession. It is our hope that this text will provide fundamentals to expand chiropractic patient care through the profession of the chiropractic therapy assistant.

Cole Hosenfeld, DC
Knoxville, Tennessee

Acknowledgements - Workbook

As we reflect on the successful endeavor of the Workbook for *Chiropractic Therapy Assistant: A Clinical Resource Guide*, we are proud of the collaborative effort that created it. We are ever-grateful to those who have directly and indirectly contributed their support to the project.

We would like to thank all of the contributors to the corresponding textbook for providing a solid foundation upon which to build the companion workbook. Special thanks to Dr. Kristen Walkerwicz, Nicole Mooney, Amy Owsley and Kayce Kiningham for all of your time and effort in creating, reviewing, editing, and providing critical assistance; your insight and energy was integral to the continuity and outcome of this work. To all those who have encouraged and empowered us through the process, especially our families, we cannot thank you enough for your support.

And finally, to all dedicated assistants in the chiropractic practice who strive everyday to reach new goals and exceed the patients' expectations of care; thank you for all you do to assist in the advancement of the chiropractic profession.

Cole Hosenfeld, D.C., C.C.S.P.
Tiffany R. Stevens, E.D., C.T.A.

ACKNOWLEDGEMENTS

We would like to thank the chiropractic physicians, CTAs, patients and all those who volunteered their time and talents to the creation of the Chiropractic Therapy Assistant: A Clinical Resource Guide, Media Component.

NOTICE

Chiropractic is an ever-changing field. Standard safety precautions must be followed. As new research and clinical experience broadens out knowledge, changes in treatment therapy may become necessary or appropriate. Viewers are advised to check the most current product and equipment information provided by the manufacturer as to its indications and contraindications. It is the responsibility of the certified/licensed health care provider, relying on experience and knowledge of the patient, to determine the best treatment protocols for each individual patient. The producers assume no liability for any injury and/or harm to persons or property arising from the use of this media component.

The material provided has been gathered from many sources. It is intended as a guide for your study. Due to variations of state statutes, rules and court opinions, the producers assume no responsibility for discrepancies relating to individual scopes of practice. Products, techniques, modalities or illustrations should not be construed as an endorsement. The guidelines, procedures, and protocols outlined in this media component reflect the standard practices in the United States at the time of production. It is the viewers' responsibility to stay informed of changes and updates to information herein.
