ACKNOWLEDGEMENTS

We would like to thank the chiropractic physicians, CTAs, patients and all those who volunteered their time and talents to the creation of the Chiropractic Therapy Assistant: A Clinical Resource Guide, Media Component.

NOTICE

Chiropractic is an ever-changing field. Standard safety precautions must be followed. As new research and clinical experience broadens out knowledge, changes in treatment therapy may become necessary or appropriate. Viewers are advised to check the most current product and equipment information provided by the manufacturer as to its indications and contraindications. It is the responsibility of the certified/licensed health care provider, relying on experience and knowledge of the patient, to determine the best treatment protocols for each individual patient. The producers assume no liability for any injury and/or harm to persons or property arising from the use of this media component.

The material provided has been gathered from many sources. It is intended as a guide for your study. Due to variations of state statutes, rules and court opinions, the producers assume no responsibility for discrepancies relating to individual scopes of practice. Products, techniques, modalities or illustrations should not be construed as an endorsement. The guidelines, procedures, and protocols outlined in this media component reflect the standard practices in the United States at the time of production. It is the viewers' responsibility to stay informed of changes and updates to information herein.
